OPTIVOR WINS NASA SEWP V.

Annapolis Junction, MD – Optivor Technologies, LLC, a Woman-Owned Small Business, is pleased to announce the award of a prime contract for the National Aeronautics and Space Administration (NASA) Solutions for Enterprise-Wide Procurement (SEWP) V under the small business subcategory of Group C for Server Support Devices/Multi-functional Devices. All the awards are for firm-fixed-price, indefinite-delivery/indefinite-quantity contracts. The minimum amount of supplies or services that may be ordered is \$25.00 with a maximum of \$20 billion per contract. Each contract will have an effective ordering period of 10 years, consisting of a five-year base period and one five-year option to extend the period of performance.

NASA selected Optivor based on their full complement of all categories and substantial depth of product offerings as well as their thorough approach to supply chain risk management, and their comprehensive and well-defined Program Management Plan.

“We are excited to work with NASA, provide our federal customer direct access to our products and services via the SEWP contract vehicle and to work with new federal customers,” Owner and Managing Director Dearest Chandler said. “This award validates Optivor’s commitment to quality processes, reducing the risk of counterfeit and tainted products, and to our technical proficiency. Not only did we receive an award, but NASA ranked our Group C proposal #1 of all proposals received in the group.”

Under the new contract, regardless of the award category, the scope of all contracts is the same. Optivor will provide to its federal customers and to all federal agencies, an Information and Communications Technology (ICT) and Audio Visual (AV) products including hardware, software, maintenance, warranty, product based engineering, installation and implementation services, and product training.
