Optivor awarded Information Technology Enterprise Solutions - 4 Hardware Contract (ITES-4H)

Orlando, Florida, September 10, 2025 — Optivor Technologies announced today that it has been awarded a prime contract under the U.S. Army's Information Technology Enterprise Solutions-4 Hardware (ITES-4H) program. This \$10 billion contract enables the U.S. Army, Department of Defense (DoD), and other federal agencies to procure a broad array of commercial IT hardware and associated services to support mission-critical operations around the world.

This latest award expands Optivor's role as a key technology partner to the federal government. Optivor was previously awarded the Information Technology Enterprise Solutions – 3 Services (ITES-3S) contract allowing the company to deliver a comprehensive range of IT services—including cybersecurity, systems integration, cloud, and managed services. With both ITES-4H and ITES-3S, Optivor is now uniquely positioned to deliver fully integrated, end-to-end technology solutions, combining hardware, services, and long-term strategic support across the entire IT lifecycle.

"We are proud to be selected for the ITES-4H contract and to continue our partnership with the U.S. Army and other federal agencies," said Stuart Chandler, CIO of Optivor Technologies. "This award is a testament to our team's long-standing commitment to delivering secure, innovative, and mission-driven technology solutions. With both ITES-3S and ITES-4H contracts, Optivor can now offer our federal customers unparalleled value and a truly integrated approach to IT modernization."
